

Setting up the Eduroam

Connection to the Eduroamu

To connect to the Eduroam network, you need to complete the following two steps.

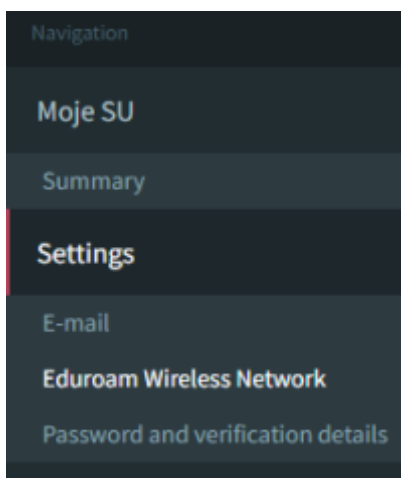

Step 1: Setting-up the identity

To connect to the Eduroam network, you will need a Eduroam Identity (username and password). This is set-up through the CRO portal moje.slu.cz:

- Login onto the website moje.slu.cz with your CRO credentials.

- In the left menu click in the **Settings** on **Eduroam Wireless Network**.

- Follow the simple instructions on the opened page.

The screenshot shows a web interface for configuring Eduroam. It is divided into two main sections: 'Information' and 'Change Eduroam password'. In the 'Information' section, there is a status message 'Access to Wi-Fi network Eduroam is active.' and a 'User name' field with the value '@slu.cz'. The 'Change Eduroam password' section contains three input fields: 'Fill the CRO password', 'Fill the new Eduroam password', and 'Repeat the new Eduroam password'. Below these fields is a red button labeled 'Change Eduroam password'. The page title is 'Settings' and 'Eduroam Wireless Network', and there is a 'My SU' link in the top right corner.

Your username will always be in the form of „**your_CRO_username@slu.cz**“ (for example **xyz9876@slu.cz**). The form of the Eduroam username is the same for all members of the SU (every faculty or institute will use **@slu.cz**).

Step 2: Setting-up the wifi on your device

After setting up your Eduroam identity, you will need to complete the setup of the Eduroam on your device. Depending on the operating system this can usually be finished simply by filling up the Eduroam username and password. Although more secure way is to use app to set you device. **Our department strongly advises to use one of the automatic utilities!**

geteduroam - utility for automatic setting of Eduroam for Windows, Mac and Android
