

Setting up the Eduroam

Connection to the Eduroamu

To connect to the Eduroam network, you need to complete the following two steps.

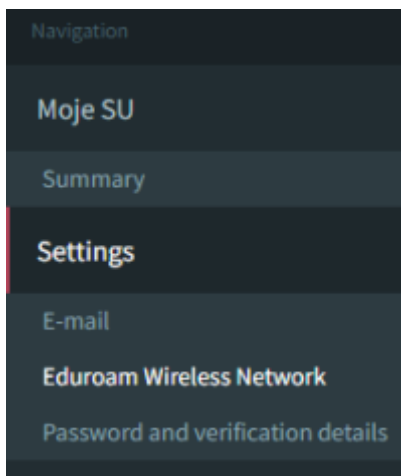

Step 1: Setting-up the identity

To connect to the Eduroam network, you will need a Eduroam Identity (username and password). This is set-up through the CRO portal moje.slu.cz:

- Login onto the website moje.slu.cz with your CRO credentials.

- In the left menu click in the **Settings** on **Eduroam Wireless Network**.

- Follow the simple instructions on the opened page.

Your username will always be in the form of „**your_CRO_username@slu.cz**“ (for example **xyz9876@slu.cz**). The form of the Eduroam username is the same for all members of the SU (every faculty or institute will use **@slu.cz**).

Step 2: Setting-up the wifi on your device

After setting up your Eduroam identity, you will need to complete the setup of the Eduroam on your device. Depending on the operating system this can usually be finished simply by filling up the Eduroam username and password. This method is not secure and can sometimes cause some problems. **Our department strongly advises to use one of the automatic utilities!**

Utility for automatic setup of the Eduroam on most devices.

For Android use the Google Play and search for geteduroam app or visit <https://www.geteduroam.app/>
