Setting up external e-mail clients

Basic steps to setup external email clients (Thunderbird, Outlook etc.) to work with Horde.

warning! ÚIT cannot help with problems caused by external clients. **Official** email client is **Horde**.

Settings of server for incoming messages:

```
type of server - imap
adress of server - imap.opf.slu.cz
port - 993
security - SSL
```

Settings of server for outgoing messages:

```
adress of server - smtp.opf.slu.cz
port - 465
security - SSL
```

CRO login and password are needed for sending and recieving e-mails.
